### **Star LED Mountain City To Supply Home Depot** *Products will be distributed to Home Depot stores nation wide*

**Mountain City, TN. May 11 2018.** - Star LED has opened up many doors of opportunity for Mountain City and surrounding areas. The company has just signed a distribution deal with Home Depot, a global leader and household brand name of home improvement supplies, tools, construction products, and services. With over 2000 locations nation wide, Star LEDs new Mountain City location will be the centre of distribution for all orders and sales - subsequently bringing more jobs to the county.

The new facility spanning over 50,000 sq. ft, will not only supply products to Home Depot but will also train Home Depot executives on LED and energy efficiency. Star LED Chairman Garry Garoni, says 'the new facility with onsite training offices, showrooms and research and development space, provides a one stop location for our brand. It has the capability to supply Home Depot Stores nation wide, train staff and even manufacture some of the products supplied to Home Depot'.

The products that are manufactured in Mountain City will be proudly displayed on packaging. Mayor Larry Potter has been instrumental in establishing Star LED in the Johnson County with the vision of bringing more jobs, good jobs, to the County which is clearly a great move for the economy.

With the support of Mayor Potter, Garoni is full steam ahead with plans to open the factory and training facility to all Johnson County residents and families. The wider community will be able to see what Star LED is forging here in Mountain City. The dream of a country town being competitive on the world stage will soon become a reality, something that the people at the helm of Star LED are very passionate about. Home grown people, products and brands is what's important to Star LED and essentially, all Americans too. The partnership of Star LED and Home Depot embodies exactly this.

Star LED provides LED lighting solutions for commercial, residential, marine and automotive applications. For more information and employment opportunities please visit [www.starled.green](http://www.starled.green)
